SAFETY DATA SHEET

RECSILICON

Silane

SECTION 1: Identification of the substance/mixture and of the company/ undertaking

1.1 Product identifier		
Product name	: Silane	
EC number	: 232-263-4	
REACH Registration nu	mber	
Registrat	ion number	Legal entity
01-2119436667-29-0001		-
CAS number	: 7803-62-5	
Product code	: Not available.	
Product type	: Liquefied gas.	
Other means of identification	: Silicon tetrahydrid	9
Chemical formula	: SiH4	

1.2 Relevant identified uses of the substance or mixture and uses advised against

Product use	: Not available.	
Area of application	: Industrial applications.	
	Identified uses	
Intermediate		
Uses advised against		
None identified.		

1.3 Details of the supplier of the safety data sheet

REC Silicon Inc. 119140 Rick Jones Way Silver Bow, Montana 59750 United State of America 406-496-9877	
3322 Road N Northeast Moses Lake, Washington 98837 United State of America 509-766-9299	7
e-mail address of person : responsible for this SDS	recsiliconSDS@recsilicon.com
1.4 Emergency telephone num	per la
<u>Supplier</u>	
Telephone number :	CHEMTREC, U.S. : 1-800-424-9300 CCN# 403 CHEMTREC International: +1 (703) 527-3887

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Product definition : Mono-constituent substance

Classification according to UK CLP/GHS

Flam. Gas 1A, H220

Press. Gas (Liq.), H280

The product is classified as hazardous according to UK CLP Regulation SI 2019/720 as amended.

See Section 16 for the full text of the H statements declared above.

ŝ

See Section 11 for more detailed information on health effects and symptoms.

2.2 Label elements

Hazard pictograms

Signal word	:	Danger	anger					
Hazard statements	:		220 - Extremely flammable gas. 280 - Contains gas under pressure; may explode if heated.					
Precautionary statements								
Prevention	1		210 - Keep away from heat, hot surfaces, sparks, open flames and other ignition urces. No smoking.					
Response	1		377 - Leaking gas fire: Do not extinguish, unless leak can be stopped safely. 381 - In case of leakage, eliminate all ignition sources.					
Storage	:	P403 - Store in	n a well-ve	ntilated pla	ice.			
Disposal	1	Not applicable.						
Supplemental label elements	1	Not applicable.						
Annex XVII - Restrictions on the manufacture, placing on the market and use of certain dangerous substances, mixtures and articles	:	Not applicable.	lot applicable.					
Special packaging requirem	en	<u>ts</u>						
Containers to be fitted with child-resistant fastenings	:	Not applicable.						
Tactile warning of danger	:	Not applicable.						
2.3 Other hazards								
Product meets the criteria	:	PBT	Р	В	т	vPvB	vP	vB
for PBT or vPvB according to Regulation (EC) No. 1907/2006, Annex XIII		Not applicable (Inorganic)	N/A	N/A	N/A	Not applicable (Inorganic)	N/A	N/A
Other hazards which do not result in classification	:	Acts as a simp air and cause s					in displace	the normal

SECTION 3: Composition/information on ingredients

3.1 Substances : Mono-constituent substance

Product/ingredient name	Identifiers	%	Classification	Туре
silane	REACH #: 01-2119436667-29 EC: 232-263-4 CAS: 7803-62-5	100	Flam. Gas 1A, H220 Press. Gas (Liq.), H280	[1]
			See Section 16 for the full text of the H statements declared above.	

There are no additional ingredients present which, within the current knowledge of the supplier, are classified and contribute to the classification of the substance and hence require reporting in this section.

Туре

[1] Constituent

Occupational exposure limits, if available, are listed in Section 8.

SECTION 4: First aid measures

4.1 Description of first aid n	neasures
Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Get medical attention if irritation occurs.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing.
Skin contact	: Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. To avoid the risk of static discharges and gas ignition, soak contaminated clothing thoroughly with water before removing it. Get medical attention if symptoms occur. In case of contact with liquid, warm frozen tissues slowly with lukewarm water and get medical attention. Do not rub affected area.
Ingestion	 Ingestion of liquid can cause burns similar to frostbite. If frostbite occurs, get medical attention. As this product rapidly becomes a gas when released, refer to the inhalation section.
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training.

4.2 Most important symptoms and effects, both acute and delayed

Over-exposure signs/symptoms Eye contact : Adverse symptoms may include the following: frostbite Inhalation : No specific data. Skin contact : Adverse symptoms may include the following: frostbite Ingestion : Adverse symptoms may include the following: frostbite 4.3 Indication of any immediate medical attention and special treatment needed Notes to physician : Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled.

3/13

SECTION 5: Firefighting measures

5.1 Extinguishing media		
Suitable extinguishing media	:	In case of fire, use water spray (fog), foam, dry chemical or CO ₂ . Leaking gas fire: Do not extinguish, unless leak can be stopped safely.
Unsuitable extinguishing media	:	Do not use water jet. / CO2
5.2 Special hazards arising fr	om	the substance or mixture
Hazards from the substance or mixture	:	Contains gas under pressure. Extremely flammable gas. In a fire or if heated, a pressure increase will occur and the container may burst, with the risk of a subsequent explosion. The vapour/gas is heavier than air and will spread along the ground. Gas may accumulate in low or confined areas or travel a considerable distance to a source of ignition and flash back, causing fire or explosion.
Hazardous thermal decomposition products	:	Decomposition products may include the following materials: metal oxide/oxides
5.3 Advice for firefighters		
Special protective actions for fire-fighters	:	Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training. Contact supplier immediately for specialist advice. Move containers from fire area if this can be done without risk. Use water spray to keep fire-exposed containers cool. If involved in fire, shut off flow immediately if it can be done without risk. If this is impossible, withdraw from area and allow fire to burn. Fight fire from protected location or maximum possible distance. Eliminate all ignition sources if safe to do so.
Special protective equipment for fire-fighters	:	Fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. For incidents involving large quantities, thermally insulated undergarments and thick textile or leather gloves should be worn.
SECTION 6: Accident	al	release measures

6.1 Personal precautions, pro	equipment and emergency proc	edures
For non-emergency personnel	involving any personal risk or wit Keep unnecessary and unprote Ik through spilt material. Shut off	or explosion hazard. No action shall be hout suitable training. Evacuate surrounding ected personnel from entering. Do not touch all ignition sources. No flares, smoking or iate personal protective equipment.
For emergency responders		al with the spillage, take note of any d unsuitable materials. See also the sonnel".
6.2 Environmental precautions	contamination of the environmen ontact with soil, waterways, drain	with accidental gas releases are in place to it. Avoid dispersal of spilt material and runoff s and sewers. Inform the relevant authorities al pollution (sewers, waterways, soil or air).
6.3 Methods and material for	nent and cleaning up	
Small spill	diately contact emergency persor tools and explosion-proof equipm	nnel. Stop leak if without risk. Use spark- ient.
Large spill		nnel. Stop leak if without risk. Use spark- nent. Note: see Section 1 for emergency waste disposal.
Date of issue/Date of revision	3/2023 Date of previous issue	: No previous validation Version : 1 4/13

SECTION 6: Accidental release measures

ŝ,

6.4 Reference to other sections

See Section 1 for emergency contact information. See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

SECTION 7: Handling and storage

The information in this section contains generic advice and guidance. The list of Identified Uses in Section 1 should be consulted for any available use-specific information provided in the Exposure Scenario(s).

7.1 Precautions for safe handling

Protective measures	: Put on appropriate personal protective equipment (see Section 8). Contains gas under pressure. Do not get in eyes or on skin or clothing. Avoid breathing gas. Use only with adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Do not enter storage areas and confined spaces unless adequately ventilated. Store and use away from heat, sparks, open flame or any other ignition source. Use explosion-proof electrical (ventilating, lighting and material handling) equipment. Use only non-sparking tools. Empty containers retain product residue and can be hazardous. Do not puncture or incinerate container.
Advice on general occupational hygiene	: Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.

7.2 Conditions for safe storage, including any incompatibilities

Do not store above the following temperature: 51.67°C (125°F). Store in accordance with local regulations. Store in a segregated and approved area. Store away from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10). Eliminate all ignition sources. Keep container tightly closed and sealed until ready for use.

Seveso Directive - Reporting thresholds

Danger criteria

	Notification and MAPP threshold	Safety report threshold
P2	10 tonne	50 tonne

7.3 Specific end use(s)

Recommendations	: Not available.
Industrial sector specific solutions	: Not available.

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational exposure limits

Product/ingredient name	Exposure limit values
silane	EH40/2005 WELs (United Kingdom (UK), 1/2020).
	STEL: 1 ppm 15 minutes.
	TWA: 0.5 ppm 8 hours.
	TWA: 0.67 mg/m ³ 8 hours.
	STEL: 1.3 mg/m ³ 15 minutes.
	EU OEL (Europe).
	TWA: 0.67 mg/m ³

Biological exposure indices

None known.

Silane

SECTION 8: Exposure controls/personal protection

Recommended monitoring procedures

: Reference should be made to appropriate monitoring standards. Reference to national guidance documents for methods for the determination of hazardous substances will also be required.

DNELs/DMELs

Product/ingredient name	Туре	Exposure	Value	Population	Effects
	DNEL DNEL	Short term Inhalation Long term Inhalation	0.67 mg/m ³ 0.67 mg/m ³		Systemic Systemic

PNECs

No PNECs available

8.2 Exposure controls	
Appropriate engineering controls	: Use only with adequate ventilation. Use process enclosures, local exhaust ventilation or other engineering controls to keep worker exposure to airborne contaminants below any recommended or statutory limits. The engineering controls also need to keep gas, vapour or dust concentrations below any lower explosive limits. Use explosion-proof ventilation equipment.
Individual protection meas	sures
Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: safety glasses with side-shields.
Skin protection	
Hand protection	 Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. If contact with the liquid is possible, insulated gloves suitable for low temperatures should be worn. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated. Recommended: Gloves: Leather. Follow safety instructions: OSHA Article 29 CFR 1910.132, 1910.136
Body protection	 Refer to European Standard: EN 388 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product. When there is a risk of ignition from static electricity, wear anti-static protective clothing. For the greatest protection from static discharges, clothing should include anti-static overalls, boots and gloves.
Other skin protection	 Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.

SECTION 8: Exposure controls/personal protection

Respiratory protection	:	Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use. Recommended: Reference should be made to monitoring standards, such as the following: OSHA 29 CFR 1910.134 / EN = European Standard (Norm) 149
Thermal hazards	:	If there is a risk of contact with the liquid, all protective equipment worn should be suitable for use with extremely low temperature materials.
Environmental exposure controls	:	Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

SECTION 9: Physical and chemical properties

The conditions of measurement of all properties are at standard temperature and pressure unless otherwise indicated.

9.1 Information on basic physical and chemical properties

<u>Appearance</u>						
Physical state	: Gas.					
Colour	: Colourle	ess.				
Odour	: Repulsi	ve.				
Odour threshold	: Not ava	ilable.				
Melting point/freezing point	: -185°C					
Initial boiling point and boiling range	: -111.7°(C				
Flammability (solid, gas)	: Not ava	ilable.				
Lower and upper explosion limit	Lower: Upper:	-				
Flash point	: Not app	licable.				
Auto-ignition temperature	: Not app					
Decomposition temperature	: Not app					
рН	: Not app					
Viscosity	: Not app	licable.				
Solubility(ies)	: Media		Result			
	water		Not soluble			
Miscible with water	: No.					
Partition coefficient: n-octanol/ water	: Not ava	ilable.				
Vapour pressure	: Not app	licable.				
Evaporation rate	: Not ava	ilable.				
Relative density	: Not app	licable.				
Vapour density	: 1.3 [Air	= 1]				
Explosive properties	: Not ava	ilable.				
Oxidising properties	: Not ava	ilable.				
Particle characteristics						
Median particle size	: Not app	licable.				
9.2 Other information						
Molecular weight	: 32.12 g	/mole				
Date of issue/Date of revision	: 29/03/2023	Date of previous	issue : No previous validatio	n Version	: 1	7/13

SECTION 9: Physical and chemical properties

Physical/chemical properties : No additional information. comments

SECTION 10: Stability and reactivity

10.1 Reactivity	:	No specific test data related to reactivity available for this product or its ingredients.
10.2 Chemical stability	:	The product is stable.
10.3 Possibility of hazardous reactions	:	Under normal conditions of storage and use, hazardous reactions will not occur. Under normal conditions of storage and use, hazardous polymerisation will not occur.
10.4 Conditions to avoid	:	Avoid all possible sources of ignition (spark or flame). Do not pressurise, cut, weld, braze, solder, drill, grind or expose containers to heat or sources of ignition. Do not allow gas to accumulate in low or confined areas.
10.5 Incompatible materials	:	Incompatible materials: Oxidiser, air
10.6 Hazardous decomposition products	:	Under normal conditions of storage and use, hazardous decomposition products should not be produced.

SECTION 11: Toxicological information

	0
11.1 Information on toxicolo	ogical effects
Acute toxicity	: Not available.
Conclusion/Summary	i not available.
Acute toxicity estimates	
N/A	
Irritation/Corrosion

Silane

SECTION 11: Toxicological information

Information on likely routes of exposure	: Routes of entry anticipated: Inhalation.
Potential acute health effects	
Eye contact	: Liquid can cause burns similar to frostbite.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: Dermal contact with rapidly evaporating liquid could result in freezing of the tissues or frostbite.
Ingestion	: Ingestion of liquid can cause burns similar to frostbite.
Symptoms related to the phy	sical, chemical and toxicological characteristics
Eye contact	: Adverse symptoms may include the following: frostbite
Inhalation	: No specific data.
Skin contact	: Adverse symptoms may include the following: frostbite
Ingestion	: Adverse symptoms may include the following: frostbite
Delayed and immediate effect	ts as well as chronic effects from short and long-term exposure
Short term exposure	
Potential immediate	: Not available.

Potential immediate effects	Not available.
Potential delayed effects	: Not available.
Long term exposure	
Potential immediate effects	: Not available.
Potential delayed effects	: Not available.
Potential chronic health eff	<u>ects</u>
Not available.	
Conclusion/Summary	: Not available.
General	: No known significant effects or critical hazards.
Carcinogenicity	: No known significant effects or critical hazards.
Mutagenicity	: No known significant effects or critical hazards.
Reproductive toxicity	: No known significant effects or critical hazards.

Other information : Not available.

SECTION 12: Ecological information

 12.1 Toxicity

 Conclusion/Summary
 : Not available.

12.2 Persistence and degradability

Conclusion/Summary : Not available.

12.3 Bioaccumulative potential

Not available.

Silane

SECTION 12: Ecological information

12.4 Mobility in soil

Soil/water partition coefficient (Koc)	: Not available.
Mobility	: Not available.

12.5 Results of PBT and vPvB assessment

Product/ingredient name	PBT	Р	В	Т	vPvB	vP	vB
silane	Not applicable (Inorganic)	N/A	N/A	N/A	Not applicable (Inorganic)	N/A	N/A

12.6 Other adverse effects

: No known significant effects or critical hazards.

SECTION 13: Disposal considerations

13.1 Waste treatment methods

Product	
Methods of disposal	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non-recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction.
Hazardous waste	: The classification of the product may meet the criteria for a hazardous waste.
Packaging	
Methods of disposal	The generation of waste should be avoided or minimised wherever possible. Empty pressure vessels should be returned to the supplier. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible.
Special precautions	: This material and its container must be disposed of in a safe way. Empty containers or liners may retain some product residues. Do not puncture or incinerate container.

SECTION 14: Transport information

	ADR/RID	ADN	IMDG	ΙΑΤΑ
14.1 UN number	UN2203	UN2203	UN2203	UN2203
